TITLE: Interactive symptomatic recording device for repair of automobile, tractor, generates standardized chart corresponding to product's symptoms input by lay person

INVENTOR: REICHWEIN, E F; WHITE, J G

PATENT-ASSIGNEE: REICHWEIN E F (REICI), WHITE J G (WHITI)

PRIORITY-DATA: 1998US-0122404 (July 25, 1998)

ABSTRACTED-PUB-NO: US 6311162B
BASIC-ABSTRACT:

NOVELTY - A presentation device displays an initial query generated by a query generator to a lay person. An input device coupled to the query generators allows the person to respond to the generated query and the query generators generates next query based on the received response, which is compiled to generate a standardized chart corresponding to the symptoms of a product.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Symptomatic problems recording method;

(b) Recording medium that stores symptomatic problem recording program

USE - For recording information regarding service or repair of automobile, tractors, trailer, fork lift, cherry picker and a front loader obtained from a customer. For human medical condition diagnosis (claimed).

ADVANTAGE - Since the standardization chart provides sufficient information, the lay person need not communicate directly with the service provider when leaving the product to the service provider.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of an interactive symptomatic recording device.
